DisQo Thematic Network

Organisations across sectors call for stronger action against racism and discrimination to achieve health equity

As part of the DG SANTE's Thematic Networks, DisQo has released a joint statement to further the discussion on the effects of racism and discrimination on health. The undersigned organisations commit to taking an active stance against all forms of racism and discrimination and call for decision-makers at all levels, including the European Commission, to follow suit.

It can still be endorsed until **17 May**.

Undernourished and Overlooked: A Global Nutrition Crisis in Adolescent Girls and Women

UNICEF

Poor nutrition harms all adolescent girls and women of reproductive age but the risks to their and their children's health and well-being are particularly high during pregnancy and the period following childbirth. UNICEF's 2022 Flagship Child Nutrition Report examines the latest data and evidence on the status, trends and inequities in the nutritional status of adolescent girls and women

Causes of death statistics by age group

Eurostat

This is an article using the most recent statistics on causes of death in the European Union (EU). It is important to identify and record the underlying reasons for deaths and make the information available to policymakers, health services and the public. Most causes of death vary significantly by age and by sex, for example

Access to NCD medicines: emergent issues during the COVID-19 pandemic and key structural factors

World Health Organization

The COVID-19 pandemic exacerbated pre-existing inequalities in the treatment and care of noncommunicable diseases (NCDs). This report examines the effect of the COVID-19 pandemic on access to NCD medicines, and the policies and strategies implemented by countries and health systems to anticipate and mitigate stresses across NCD medicine supply chains.

Minister Joe O'Brien announces publication of Ireland's National Action Plan Against Racism 2023-2027

Government of Ireland

The plan proposes actions to help make Ireland a place in which the impacts of racism are fully acknowledged and actively addressed. It was developed by an independent Anti-Racism Committee established by Charles Flanagan, then Minister for Justice and Equality and Minister of State David Stanton in 2020.

Romania: Funding for NGOs working on social inequalities

European Commission

A new call for proposals from the annual In stare de bine initiative offers grants for projects assisting vulnerable groups and communities. This year, the objective of the call is to reduce social inequalities through culture, sports activities and the promotion of healthy lifestyle. Eligible projects will address the needs of vulnerable groups such as asylum seekers and refugees, homeless people, children at risk of poverty or school dropout, Roma communities, and others.

Lancet Series: Commercial Determinants of Health

Defining and conceptualising the commercial determinants of health

The first paper of the series advances the understanding of how commercial actors drive health and equity by bringing some consensus around the complexity and scope of the issue. The authors suggest a conceptual model of the commercial determinants of health highlighting how health inequity can arise from the CDOH.

[READ MORE](#)

Conceptualising commercial entities in public health

This paper highlights the importance of looking beyond traditional segments of the commercial determinants of health, and to consider commercial entities that are relevant to public health. It suggests a framework that captures this scope and enables fuller consideration of how commercial actors might influence health outcomes

[READ MORE](#)

Commercial determinants of health: future directions

Paper three focuses on the future role of the commercial sector in global health and health equity by calling the global health community to move beyond observation to action. As highlighted, health actors can and must use their regulatory power to change policy systems and to move towards progressive economic models.

Racism, xenophobia, and discrimination: data disaggregation is a complex but crucial step to improving child health

The Lancet

The disaggregation of data makes health inequities visible that would otherwise be masked, allowing for an intersectional approach to designing policies and programmes. However, child health data are infrequently disaggregated in ways that can spotlight inequalities among children who face racism and discrimination, and action is insufficient on this crucial health issue.

Conference explores link between anti-Roma racism and health disparities

Harvard T.H. Chan School of Public Health

The repercussions of anti-Roma racism were discussed at the 11th annual Roma Conference at Harvard T.H. Chan School of Public Health, held April 6. The conference focused on how Roma people in Europe experience considerably worse health outcomes than ethnic majorities.

Social barriers faced by Roma, Gypsies and Travellers laid bare in equality survey

The Guardian

The survey revealed shocking health disparities between Roma, Gypsy and Traveller people and the rest of the population. Gypsy or Traveller men were 12.4 times as likely to suffer from two or more physical health conditions than white British men, while Roma men were five times as likely – both were higher figures than for any other ethnicity.
